

**Pay No Attention to the Man Behind the Screen! Why Freud Abandoned Hypnosis – The Rhymes and Reasons of “Othering” (Inconvenient) Realities, Then and Now**

**May 20, 2021 | 6:00 PM – 8:00 PM EDT**

**Presenter:** Richard P Kluft, MD, PhD

**Presenter Biography:** Richard P. Kluft, M.D., Ph.D., Clinical Professor of Psychiatry at Temple University School of Medicine, practices in Bala Cynwyd, PA. He teaches at the Psychoanalytic Center of Philadelphia, where he is a Waiver Training Analyst, and at the China American Psychoanalytic Alliance. He has authored over 270 scientific papers, book chapters, and reviews, most concerning trauma, dissociative disorders, hypnosis, and psychoanalysis. *Shelter from the Storm*, exploring a compassionate approach to the abreaction of trauma, won the ISST&D’s 2013 Written Media Award. His edited books include *Childhood Antecedents of Multiple Personality* and *Incest-Related Syndromes of Adult Psychopathology*. He and Catherine G. Fine, Ph.D., co-edited *Clinical Perspectives on Multiple Personality Disorder*. Dr. Kluft was Editor-in-Chief of the journal *DISSOCIATION* for ten years. Currently, he is Clinical Forum Editor of the *International Journal of Clinical & Experimental Hypnosis*, and Advisory Editor of the *American Journal of Clinical Hypnosis*. He was a co-founder and the second President of the ISST&D. He has been President of the American Society of Clinical Hypnosis and the Society for Clinical and Experimental Hypnosis, and 1997 International Conference Chair of the International Society of Hypnosis. He has received numerous awards for his published research, clinical contributions, and teaching here and abroad. He has a second career as a novelist. He has published three novels, *Good Shrink/Bad Shrink* (2014), *An Obituary to Die For* (2016) and *A Sinister Subtraction* (2019); and a novella, *How Fievel Stole the Moon: A Tale for Sweet Children and Sour Scholars* (2014).

**Potential to Distress:** No

**Abstract:** One hundred and twenty-five years ago Sigmund Freud repudiated the use of therapeutic hypnosis. While this has been celebrated, retroactively, as a great leap forward, understood as Freud’s moving beyond a problematic paradigm to make way for his new and enlightened psycho-analysis, ample historical evidence allows an alternative line of explanation; i.e., that sensational and celebrated events, long forgotten although they seized the world’s attention at the time, may have motivated Freud’s decision. This argument is rendered more plausible because Freud’s increasingly negative stance toward hypnosis and his characterizing it as controlling and demanding submission of its subjects was first articulated ten years later after his decision, and that his still more depreciating assessments of hypnosis were derived from sensational sources in the contemporary lay media rather than from scholarship and/or the forms of therapeutic hypnosis Freud had been taught, had observed, and had practiced. The primary gains associated with the development of psycho-analysis were accompanied by secondary losses, including the marginalization of therapeutic hypnosis. This occurred even though Freud built many aspects of hypnosis into his psycho-analysis. This marginalization of powerful and legitimate therapeutic modalities primarily by the powerful impact of lay media sources was replicated during the “memory wars” of the 1990s. Once again, hypnosis was demonized. Findings from series describing its use in effective treatments was disregarded. The study of these events from another era and an assessment of their deleterious consequences for the quality of the treatment of traumatized and dissociative patients may offer helpful insights for the assessment of current paradigms in the dissociative disorders field, and to encourage sensitive concerns regarding the potential secondary losses incurred by their adoption. Clinicians of today are well-positioned to heal the longstanding rift between hypnosis and psycho-analysis caused by Freud’s decision, and to restore many of the therapeutic interventions and approaches usually associated with hypnosis and lost to general usage for over a century to the mainstream of non-hypnotic psychotherapies.

Why review this today? Because treatments facilitated by hypnosis have been the most successful therapies for major dissociative disorders, and when hypnosis was once again represented in the lay media as a

dangerous creator of false memories and a destroyer of families, it was marginalized. Subsequent treatment outcome series have not matched the success of hypnosis-facilitated treatments. It is timely to remediate the gaps in understanding that have effectively sidelined helpful treatment strategies, and once again put them to use for the benefit of those suffering dissociative disorders.

## Objectives

Upon Completion of this webinar, participants will be able to:

- Appraise a paradigm for its inclusions or exclusions of the core phenomena of conditions understood through that paradigm
- Discuss hypnotic elements found in Freud's instructions to patients beginning analysis
- List twelve ways to bring techniques derived from hypnotic interventions into psychodynamic psychotherapy

## Can't Make it?

If your schedule won't allow for you to attend, the webinar will be recorded and made available for purchase approximately two weeks after the live event. The recordings cost is \$25 for ISSTD members and \$45 for non-members. The webinar recording can be accessed on the CE-Credit.com website or in ISSTDWorld for ISSTD members. Exam fees for Continuing Education credits start at an additional \$10.46.

## Continuing Education

### ASWB

The International Society for the Study of Trauma and Dissociation (ISSTD), #1744, is approved to offer social work continuing education by the Association of Social Work Boards (ASWB) Approved Continuing Education (ACE) program. Organizations, not individual courses, are approved as ACE providers. State and provincial regulatory boards have the final authority to determine whether an individual course may be accepted for continuing education credit. ISSTD maintains responsibility for this course. ACE provider approval period: 08/20/2020 – 08/20/2021. Social workers completing this course receive 2 continuing education credits.

CE Learning Systems is a co-sponsor of this event for the following approvals for 2 continuing education credits pending approval:

### APA

CE Learning Systems is approved by American Psychological Association to sponsor continuing education for psychologists. CE Learning Systems maintains responsibility for this program and its content.

### NYSW

CE Learning Systems SW CPE is recognized by the New York State Education Department's State Board for Social Work as an approved provider of continuing education for licensed social workers #0060.

### NYLMHC

CE Learning Systems, LLC is recognized by the New York State Education Department's State Board for Mental Health Practitioners as an approved provider of continuing education for licensed mental health counselors. #MHC-0072.

**NYLCAT**

CE Learning Systems (d/b/a CE-credit.com), is recognized by the New York State Education Department's State Board for Mental Health Practitioners as an approved provider of continuing education for licensed creative arts therapists. #CAT-0008.

**Texas Board of Social Work Examiners**

CE-Go, a service of CE Learning Systems, is approved to offer continuing education courses by the Texas State Board of Social Worker Examiners (#6460). CE Learning Systems maintains responsibility for the courses.
